Property Owner: Bonnet Creek Resort Community Development

Dear Jan:

This confirms that the Bonnet Creek Resort Community Development District (the "CDD") has retained me and my law firm to represent it in any acquisition and/or eminent domain action by the Florida Department of Transportation ("FDOT") for the above-referenced project. Our representation will cover all stages of the acquisition and/or eminent domain action including negotiations and trial.

The following Agreement is made regarding my firm's attorney fees and costs for this legal representation:

By Florida law, Section 73.092, Florida Statutes, FDOT (as the taking authority) is required to pay my firm's fees and costs for representing the CDD. My firm agrees to accept these statutory attorney's fees as our fee for the representation. Our fee is in addition to what the CDD is paid as full compensation for the property taken. The CDD agrees that it will not accept a settlement offer that is conditioned upon my firm waiving any or all of our statutory fees.

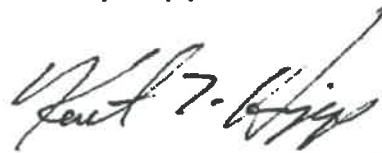

We will be required to retain experts such as an appraiser, land planner and engineer in order to determine the appropriate amount of compensation for the taking of the CDD's land and any compensable damage to the remaining property. By law, the taking authority is required to pay reasonable fees for these necessary experts. Accordingly, these experts will defer their fees and accept the court award or negotiated settlement in full payment of their fees.

Pursuant to GrayRobinson's file retention policy, at the conclusion of the CDD's case, we will maintain the CDD's file for ten (10) years. After ten years, the CDD's file will be destroyed.

If the above stated arrangement meets with the CDD's approval, please indicate so by having this letter signed by an authorized representative of the CDD in the space provided below, and return it to our offices. The CDD's approval of this letter will include agreement regarding the fees and costs arrangement.

We appreciate the confidence and trust the CDD has placed in our firm in asking us to represent it. We encourage you to communicate with us if at any time there are questions on the status or progress of the CDD's matter.

Very truly yours,

Kent L. Hipp, Esquire

9/16/22 Service call on the Irrigation Pump Station at Bonnet Creek Resort CDD: Perform PM and clean Filter. Technician Roben drove to site. Cleaned all of the spider webs up before could get into the building to clean or perform the pm service. Isolated the filter to pull for inspection and cleaning. There was a lot of algae that was covering the filter. Filter was not as dirty as the last filter cleaning but the station may not be running as much since it has been raining more frequently. Pressure washed the filter, pre-screen, filter housing and the housing cover. Checked the reverser and the reverser has no signs of wear. Stroked the filter by hand before reinstalling the filter. Installed the filter and left the filter isolated for the pm service. Filter is flushing every 20 minutes for 60 seconds. Cleaned the wye strainer screen on the PRV and cleaned the ports for the transducers. Checked and cleaned low level transducer. The low level transducer had algae growing on it also.

Went through the cabinet and checked terminals and connections. Some of the lug connection in the cabinet were a little loose. Everything else was good. Motors megged lower than last service but the motors were not warm and probably didn't run last night. Motors still megged good and ran good. Pumps have mechanical seals on them. Valve the filter back in and flushed the filter to make sure filter was stroking. Pressure washed the station and the outside of the building. Wiped down the motors and scrubbed the control cabinet and the manifold to get the black spots off of it. Took awhile to clean the station up. Wiped everything dry and wiped the station down with WD-40.

9/23/22 Service call on the Irrigation Pump Station at Bonnet Creek Resort CDD: Troubleshoot filter fault. Technician Roben drove to the site. Station went down on a filter fault on 9/22/22. Isolated the filter and got the station back up and running. Filtered the filter out, it was super dirty. Pressure washed the filter, pre-screen, inside the filter housing and the lid. Checked the reverser to make sure no damage occurred to it. The reverser was good and filter is stroking. Installed the filter. There was about 150gpm running after the filter was back online. Manually flushed the filter to make sure it was stroking. The site manager that works for Clayton came by and Roben spoke with him and explained the finding. Roben was just recently out on 9/1/22 for a filter clean and pm service. A Chlorine System is going to be that next approach for helping with the filter getting so dirty so fast. The site manager requested a quote a Chlorine System, will send it to Clayton.

Site Date:

11/21/22 Service call on the Irrigation Pump Station at Bonnet Creek Resort CDD: Clean Filter and Quarterly Preventative Maintenance Service. Technician Roben drove to site. Customer bypassed the filter so the station would run until Roben could get out to clean the filter. Was set to be site on 11-10-22 but Hurricane Nicole was going through that morning and conditions were too bad to drive to Orlando. Quarterly PM service was due in December but moved it up to the 21st of November with the filter clean. Pulled the filter out to clean the filter. The filter was covered in a brown sludge like material like it has been when the filter gets clogged and the station shuts down. The inside of the screen gets plugged up and water can barely get through. Pressured washed the filter clean and took several times of cleaning to get the filter clean. Checked the reverser and there was no signs of wear on the reverser. Washed out the inside of the filter housing. Reinstalled the filter and prescreen. Bolted the lid back on the filter housing. Cleaned the wye strainer screen for the prv and flushed the ports for the pressure transducers. Checked and cleaned the low level float. Looked over the components in the cabinet. While on site addressed the alarm 042 for VFD #3. Removed the front cover and removed the two screws as shown in the diagram sent from station manufacturer. Removed the two screws and that is all that was seen to do to the drive.

We will see if this fixes the problem or if there has to be further diagnosing. Cleaned the spider webs out of the pump house and washed the station down. Washed out the pump heads and flushed the drain tubes. Valved the filter back in and checked to make sure the filter was stroking. Wiped the station down and then wiped the station down with WD-40. Motor #3 is making a loud pitch noise, this only happens at about 70% speed and goes away at low and higher speeds. This could be from the motor not running in awhile since the VFD goes out on an alarm and doesn't get reset to allow the motor to run.

Re: \$25,605,000 Bonnet Creek Resort Community Development District, (Orange County, Florida),
Special Assessment Refunding Bonds, Series 2016

Dear Ms. Costa:

AMTEC has prepared certain computations relating to the above referenced bond issue (the “Bonds”) at the request of the Bonnet Creek Resort Community Development District (the “District”)

The scope of our engagement consisted of preparing the computations shown in the attached schedules to determine the Rebtable Arbitrage as described in Section 103 of the Internal Revenue Code of 1954, Section 148(f) of the Internal Revenue Code of 1986, as amended (the “Code”), and all applicable Regulations issued thereunder. The methodology used is consistent with current tax law and regulations and may be relied upon in determining the rebate liability. Certain computational methods used in the preparation of the schedules are described in the Summary of Computational Information and Definitions.

Our engagement was limited to the computation of Rebtable Arbitrage based upon the information furnished to us by the District. In accordance with the terms of our engagement, we did not audit the information provided to us, and we express no opinion as to the completeness, accuracy or suitability of such information for purposes of calculating the Rebtable Arbitrage.

We have scheduled our next Report as of September 30, 2023. Thank you and should you have any questions, please do not hesitate to contact us.

Very truly yours,

Michael J. Scarfo
Senior Vice President

Trong M. Tran
Assistant Vice President

SUMMARY OF COMPUTATIONAL INFORMATION AND DEFINITIONS

COMPUTATIONAL INFORMATION

1. For purposes of computing Rebatale Arbitrage, investment activity is reflected from October 14, 2016, the date of the closing, to September 30, 2022, the Computation Period. All nonpurpose payments and receipts are future valued to the Computation Date of October 14, 2026.
2. Computations of yield are based on a 360-day year and semiannual compounding on the last day of each compounding interval. Compounding intervals end on a day in the calendar year corresponding to Bond maturity dates or six months prior.
3. For investment cash flow, debt service and yield computation purposes, all payments and receipts are assumed to be paid or received respectively, as shown on the attached schedules.
4. Purchase prices on investments are assumed to be at fair market value, representing an arm's length transaction.
5. During the period between October 14, 2016 and September 30, 2022, the District made periodic payments into the Interest, Sinking, Revenue and Prepayment Funds (collectively, the Debt Service Funds) that were used, along with the interest earned, to provide the required debt service payments.

Under Section 148(f)(4)(A), the rebate requirement does not apply to amounts in certain bona fide debt service funds. The Regulations define a bona fide debt service fund as one that is used primarily to achieve a proper matching of revenues with principal and interest payments within each bond year. The fund must be depleted at least once each bond year, except for a reasonable carryover amount not to exceed the greater of the earnings on the fund for the immediately preceding bond year or 1/12th of the principal and interest payments on the issue for the immediately preceding bond year.

We have reviewed the Debt Service Funds and have determined that the funds deposited have functioned as a bona fide debt service fund and are not subject to the rebate requirement.

6. According to the IRS Form 8038-G, the yield on the Bonds is 4.500300%.

DEFINITIONS

7. Computation Date

October 14, 2026.

8. Computation Period

The period beginning on October 14, 2016, the date of the closing, and ending on September 30, 2022.

9. Bond Year

Each one-year period (or shorter period from the date of issue) that ends at the close of business on the day in the calendar year that is selected by the Issuer. If no day is selected by the Issuer before the earlier of the final maturity date of the issue or the date that is five years after the date of issue, each bond year ends at the close of business on the anniversary date of the issuance.

10. Bond Yield

The discount rate that, when used in computing the present value of all the unconditionally payable payments of principal and interest with respect to the Bonds, produces an amount equal to the present value of the issue price of the Bonds. Present value is computed as of the date of issue of the Bonds.

11. Taxable Investment Yield

The discount rate that, when used in computing the present value of all receipts of principal and interest to be received on an investment during the Computation Period, produces an amount equal to the fair market value of the investment at the time it became a nonpurpose investment.

12. Issue Price

The price determined on the basis of the initial offering price at which price a substantial amount of the Bonds was sold.

13. Rebatable Arbitrage

The Code defines the required rebate as the excess of the amount earned on all nonpurpose investments over the amount that would have been earned if such nonpurpose investments were invested at the Bond Yield, plus any income attributable to the excess. Accordingly, the Regulations require that this amount be computed as the excess of the future value of all the nonpurpose receipts over the future value of all the nonpurpose payments. The future value is computed as of the Computation Date using the Bond Yield.

14. Funds and Accounts

The Funds and Accounts activity used in the compilation of this Report was received from the District and U.S. Bank, Trustee, as follows:

Name	Number
Revenue	224102000
Interest	224102001
Sinking	224102002
Debt Service Reserve	224102003
Prepayment	224102004
Cost of Issuance	224102005

METHODOLOGY

Bond Yield

The methodology used to calculate the bond yield was to determine the discount rate that produces the present value of all payments of principal and interest through the maturity date of the Bonds.

Investment Yield and Rebate Amount

The methodology used to calculate the Rebatable Arbitrage, as of September 30, 2022, was to calculate the future value of the disbursements from all funds, subject to rebate, and the value of the remaining bond proceeds, at the yield on the Bonds, to October 14, 2026. This figure was then compared to the future value of the deposit of bond proceeds into the various investment accounts at the same yield. The difference between the future values of the two cash flows, on October 14, 2026, is the Rebatable Arbitrage.
